Image Sticking Precaution

When watching a still Image within motion pictures and Wide/Panorama/Zoom/ /4:3 screen/14:9

Wide,Panorama,Zoom,4:3,14:9, screen

Box still image

1. Note :

- When the central area of the screen and the screen edges are fixed, the different brightness level of the edges may cause image retentions on the edges when watching for a long time
- This phenomenon happens also to products from other manufacturers. Please avoid watching a still image for a long time.
- If you watch a still image for a long time, this may damage your TV.

* This matter does not come under the warranty.

Safety Precaution

The contents of this section are provided for the safety of users and their property. Please read the instructions carefully before using.

Outdoor Antenna Grounding

If an outside antenna or cable system is connected to the TV, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code, ANSI/NFPA No.70-1984, provides information about proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

Example of Grounding According to National Electrical Code Instruction

Do not connect multiple electrical appliances to a single outlet.

- It may cause a fire due to overheating from the outlet.

Make sure to remove the speakers before moving the TV with speakers mounted on it.

- When the speakers are detached from the unit while carrying it, this may cause damage to the unit or personal injury.

Do not use or store a flammable spray or inflammable things near the TV.

- They may cause explosion or fire.

Do not install the TV in a bookshelf, closet, or a place with poor air circulation.

- Fire may be caused due to the rise of internal temperature.

Any necessary action such as making the antenna cable loop at the entrance of the building should be taken to prevent rainwater on the outdoor antenna cable from possibly running indoor.

- If raindrop gets into the TV, it may cause a fire or an electric shock.

Safety PrecautionContinued from previous page

The contents of this section are provided for the safety of users and their property.
Please read the instructions carefully before using.

ENGLISH

If there is a persistent accumulation of dusts or water on the plug, please make sure to wipe it off using a dry cloth.
- It may cause a fire or an electric shock.

Firmly plug in the power cord so that it does not pull out.
- An unstable connection may cause fire.

Do not use a damaged power cord or plug, or loose outlet.
- It may cause electric shock or fire.

Do not put a water bowl, vase, candle, bug repellent, smoke, cigarette, plants, or heavy thing on the TV.
- It may cause electric shock or fire and also heavy things may cause injury when they fall.

Do not install in a place where there is oil, smoke, excessive humidity, or where water may be sprinkled on it.
- This may cause electric shock or fire.

Do not install on an unstable place or small support.
- This may cause the TV to fall, resulting in serious injury especially to children.

Never attempt to open, fix, or modify your TV.
- When there is a need for fixing, call a service center. Fire or electric shock may be caused.

Do not put a metallic object like chopstick, wire, or puncher or inflammables like paper or a match in a vent, headphone jack, or AV jacks of the TV.
- Electric shock or fire may be caused.

When the TV produces abnormal noise, burning smell, or smoke, unplug the TV immediately and call a service center.
- Electric shock or fire may be caused.

Please avoid touching the panel at the rear of TV as it is producing high temperature.
 - Direct contact with the hot surface may cause physical burns.

Do not place any heat sources such as radiators and heat registers, etc. near the TV.
 - It may cause a fire.

Do not block ventilating slits with a table cloth.

- Blocking the ventilation slits may produce internal heat increase, resulting in a fire.

Do not allow children to climb or play on the TV.
 - This may cause the TV to fall resulting in serious injury.

Do not place toys and cookies, etc. on the TV, which may attract children's attention.
 - This may cause the TV to fall, resulting in serious injury.

When cleaning the TV, make sure to disconnect the power plug and use a dry, soft cloth for a cleanup.

- Please avoid using chemicals such as wax, benzene, alcohol, thinner, mosquito spray, air freshener, lubricant or synthetic detergent.

Unplug when you do not use your TV for a long time.

- If dust is stacked on the TV, electric shock or fire may be caused from heat, fire, or deterioration of insulation.

When moving the TV, two or more people are advised to carry it.
 - This may cause damage to the unit or personal injury.

Never touch the power plug or outlet with wet hands.

- This may cause electric shock.

Safety PrecautionContinued from previous page

The contents of this section are provided for the safety of users and their property.
Please read the instructions carefully before using.

Do not install the product on the floor.
- This may cause the TV to fall resulting in serious injury.

Unplug the product during lightning or thunderstorms and never touch the antenna cable.
- It may cause a fire or an electric shock.

Keep the remote control batteries out of sight and out reach of children.
- If your child swallows a battery, see your doctor immediately.

When replacing batteries, make sure to match the batteries to the (+) and (-) marks in the battery compartment.

- Mismatching of polarities may result in internal damage to batteries, fire due to leakage or contamination.

In the event of damaging or dropping the product, switch off the power and remove the plug.

- Using a damaged product may cause an electric shock or a fire.
- Contact your local service center.

Always use the standard batteries and avoid using old batteries together with new ones.

- Otherwise it may result in internal damage to batteries, fire due to leakage or contamination.

Before moving the product, ensure to switch off the power and unplug all the electrical cords and the external connection cords such as an antenna cable and other source connections, etc.

- Electrical cords may be damaged, resulting in a fire or an electrical shock.

Ensure the power cord doesn't trail across any hot objects like a heater.

- This may cause a fire or an electric shock.

Consult a service center or customer service for inside cleaning about once a year.

- When dust is piled inside the TV for a long time, fire or malfunction may be caused.

Contents of the Package

When opening the package, please ensure to check the following accessories.

Antenna Cable
(coaxial cable)

Power Cord

Remote Control &
2 batteries (1.5V AAA)

(See pages 36 for more details.)

1. CH. LIST

To watch the channel list for Digital TV. Press key to confirm or press EXIT to return to previous channels.

2. GUIDE (EPG-Electronic Program Guide)

To watch the program information. Press once more to return to normal mode.

3. TV-RADIO

To switch between the TV channel and radio channel for Digital TV.

4. S.MODE

To adjust the subtitle and audio condition/status of the current channel for Digital TV

5. WHITE rubber

DTV : To add a new channel to the Channel List menu.

6. ORANGE rubber

DTV : To see variant channel lists for user's convenience in the Channel List menu.

7. RED rubber

- DTV : To setup favorite channel lists in the Channel List menu.
- ATV : To delete a channel in the Program Edit menu.

8. GREEN rubber

- DTV : To lock favorite channel lists in the channel list menu.
- ATV : To sort channels in the Program Edit menu.

9. YELLOW rubber

- DTV : To move favorite channel lists in the channel list menu.
- ATV : To edit channel names in the Program Edit menu.

10. BLUE rubber

DTV : To delete a channel from the channel List menu. To show extended program information in the EPG menu.

11. TTX/MIX

To see Teletext Service Data for Analog TV and Digital TV.

How to Insert Batteries in the Remote Controller

* Battery type :1.5V/AAA

Connecting Indoor/Outdoor TV Antenna(UHF/VHF)

- Antenna or Cable service without cable box connections
- For on optimum picture quality, adjust the direction of antenna if needed.

- ✓ When inserting a 75 Ω ohm coaxial cable into the input connection, ensure the wire tip not to bend.
- ✓ If you experience poor signal reception, we recommend you purchase a signal amplifier for better picture quality.

Connecting Antenna Input Connection to External Equipments

1. Connect an antenna cable to VCR/Cable/Satellite Receiver with the antenna input.
2. Use a coaxial cable to connect VCR/Cable/Satellite Receiver's antenna output to the antenna input on your TV.

Before Connecting the Video/Audio Connections to External Devices...

Please make sure to read the following instruction to enjoy the best picture quality.
Best picture quality is displayed in the following order.

How to Connect a DTV Receiver or DVD Player

1. Connect the Video cable (Y, Pb, Pr) between output terminals (Y, Pb, Pr) of DTV receiver or DVD player and the input terminals (Y, Pb, Pr) of DTV/DVD (576i/576p/720p/1080i) on the rear of TV.
(Connect the jacks to terminals in the same color.)
2. Connect the Audio cable between Audio output terminals of DTV receiver or DVD player and Audio input terminal for DTV/DVD Audio on the rear of TV. (Connect the jacks to terminals in the same color.)

- ✓ Output terminal mark (Y, Pb, and Pr) of DVD player may be indicated as Y, B-Y, R-Y/Y-Cb-Cr /Y-Pb-Pr according to the type of DVD player models.
- ✓ If your DVD player or Set Top Box supports HDMI/DVI or D-SUB, see Connecting to a PC (page 13) for connection. You can enjoy more clearer picture quality.

How to Connect a VCR, Cable Receiver, Camcorder, Game Player

1. Connect the Video cable or S-Video cable between Video/S-Video output terminals of VCR or Cable receiver and Video/S-Video input terminal of TV. (Connect the jacks to terminals in the same color.)
2. Connect the Audio cable (Left: white, Right: red) between Audio output terminals of VCR or cable receiver and Audio input terminal of TV. (Connect the jacks to terminals in the same color.)

✓ To enjoy a better picture quality, use the S-Video cable rather than the composite cable.

How to Connect to a PC

1. Connect the PC signal cable (15-pin D-sub) between the output terminal of PC and the D-sub input terminal of TV.
2. Connect the Audio cable between Audio output terminal of PC and Audio input terminal for PC on the rear of TV. (Connect the jacks to terminals in the same color.)

- ✓ If you use DVI/HDMI connection, you can enjoy better picture quality.
- ✓ This product supports Plug-and-Play function.
- ✓ We recommend the above method if the DVD player or set top box supports DTV signal with DVI or HDMI cable for better picture quality.
- ✓ If you input an unsupported resolution in PC or DVI/HDMI mode, the screen won't be displayed properly.
- ✓ DTV Timing is not guaranteed on the PC D-Sub mode

Resolutions Supported in PC

Model	26" / 32" / 37" / 42" / 46"	
	Horizontal frequency	Vertical frequency
640 x 350	31.47	70.00
	-	-
640 x 480	37.86	72.80
	31.50	75.00
	-	-
	-	-
720 x 400	31.47	70.08
800 x 600	37.88	60.32
	46.88	75.00
	48.08	72.19
832 x 624	49.73	74.55
1024 x 768	48.36	60.00
	56.48	70.07
	60.02	75.03
1280 x 1024	63.98	60.02
1366 x 768	61.27	74.99

Scart Connection to the External Input/Output

If you have a second VCR and wish to copy cassettes tape. Connect the source VCR to "F Scart" and the target VCR to "H Scart" so that you can redirect the signal from "F Scart" to "H Scart".

* "F Scart" sends the TV broadcast signal received through an antenna to a set-top box and receives the descrambled signal back, which allows you to view TV broadcasts in AV Mode.

* "H Scart" you are capable to record live TV broadcasts on the TV screen. (Please make sure that your TV is "ON".)

✓ When switching voltage comes into the Scart-Pin 8 during viewing a TV program, the current mode will be switched to Scart mode.

HDMI Connection (For HDMI model only)

HDMI*¹ (High Definition Multi media Interface) is the first all digital consumer electronics A/V interface that supports uncompressed standard. The HDMI terminal supports both video and audio information.

To the HDMI™ input terminal, you can connect an EIA/CEA-861/861*² compliant consumer electronic device, such as a Set Top Box or DVD player with HDMI or DVI output terminal.

► Compatible VIDEO Signal

Model	Resolution	Vertical frequency
1080i	1,920 x 1,080i	50
576p	720 x 576p	50
	640 x 576p	50
720p	1280 x 720p	50

- This input terminal is not intended for use with computers.

► Compatible sampling frequency of AUDIO signal through HDMI (L.PCM) : 48kHz / 44.1kHz / 32 kHz

↳ Notes :

- This HDMI connector is Type A.
- If you connect an equipment without a digital output terminal, connect to the COMPONENT VIDEO, S VIDEO or VIDEO input terminal on the TV so you can enjoy an analog signal.
- The DIGITAL IN terminal can only be used with 1080i, 720p or 576p picture signals. Set the Digital Set -Top -Box DIGITAL OUT terminal Output setting to 1080i, 720p or 576p. For detailed information, refer to the Digital Set -Top -Box instruction manual. If you cannot display the picture because your Digital Set -Top -Box does not have a DIGITAL OUT terminal Output setting, use the component Video Input (or the S Video Input or Video Input). In this case the picture will be displayed as an analog signal.

*1. HDMI, the HDMI logo and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC.

*2. EIA/CEA-861/861B profiles compliance covers profiles for transmission of uncompressed digital video including high bandwidth digital content protection.

How to Set the OSD Screen

F-SCART - For supporting composite video and RGB video signals. SCART connectors is used with many European video equipments.

AV : For supporting the color shade(chrominance) and brightness(luminance) information into one video signal.

S-VIDEO : For supporting better resolution than composite video, which carries the signals together.

Component : For supporting greater color accuracy than composite video or S-VIDEO by splitting chrominance into one video signal.

HDMI : High Definition Multi media Interface that supports both video and audio information.

PC : For supporting Personal Computer connection.

iDTV : Digital Terrestrial broadcasting for supporting DVB-T System.

ANALOG TV - Terrestrial broadcasting for supporting analog PAL/SECAM system.

H-SCART - Basically the same as Full SCART in function but not supporting RGB Video signals.

Different OSD Menu

You can confirm OSD menu of three different types.

✓ In case of the source in ATV

✓ In case of the source in iDTV

How to Select the Picture Mode

Users can automatically adjust the picture mode according to the input mode.

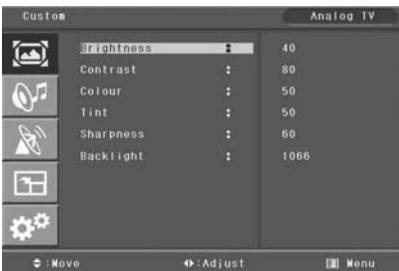

- 1 Press MENU button.
Menu items appear on the screen.
- 2 Press \downarrow button to select "Picture" Icon.
"PICTURE MODE" is highlighted.
- 3 Press \leftarrow / \rightarrow or \downarrow buttons to select "Picture mode".
- 4 The menu changes in the following order.
CUSTOM \rightarrow DYNAMIC \rightarrow STANDARD \rightarrow MOVIE \rightarrow MILD
- 5 Press EXIT button to TV viewing or press MENU button to return to the previous menu.

- ◆ CUSTOM : When the user wants to set the values directly.
- ◆ DYNAMIC : Clear display
- ◆ STANDARD : Most video contents are appropriate to this mode.
- ◆ MOVIE : When watching a movie
- ◆ MILD : Soft display.

✓ In the custom's mode, the users can adjust their desired brightness, contrast, colour, Tint, sharpness and backlight.

How to Set the Desired Picture

Users can manually adjust their desired picture

- 1 Press MENU button.
Menu items appear on the screen.
- 2 Press \downarrow button to select "Picture" Icon.
"PICTURE MODE" is highlighted.
- 3 Press \uparrow / \downarrow buttons to move to "Custom" and press \leftarrow / \rightarrow or \downarrow buttons to select "CUSTOM".
- 4 Select required option by pressing the \uparrow / \downarrow or button, then Press \leftarrow / \rightarrow button to adjust.
- 5 Press EXIT button to TV viewing or press MENU button to return to the previous menu.

- ◆ BRIGHTNESS : Adjust the brightness of the entire picture.
- ◆ CONTRAST : Adjust the brightness and darkness of the object and backgrounds.
- ◆ COLOUR : Adjust colors into deeper or lighter colors.(not operational in pc mode)
- ◆ TINT : Adjust colors naturally.(not operational in pc iDTV and component mode)
- ◆ SHARPNESS : Adjust the clarity of object outlines.(not operational in pc iDTV and component mode)
- ◆ PHASE : To remove the picture shaking.
To eliminate the Shake of picture(operational in component and iDTV Mode)
- ◆ BACKLIGHT : Adjust the brighten or darken of the screen.

How to Set the Desired Picture in PC, HDMI Input Modes

Users can adjust Color as users want.

- 1 Press MENU button.
Menu items appear on the screen.
- 2 Press \downarrow button to select "Picture" Icon.
picture mode is highlighted.
- 3 Press \leftarrow / \rightarrow or \downarrow buttons to select to "picture mode".
- 4 The menu changes in the following order.
→ CUSTOM → HIGH → MIDDLE → LOW
- 5 After selecting Color Tone, then the menu changes in the following order.
→ CUSTOM → COOL2 → COOL1 → NORMAL → WARM1 → WARM2
- 6 If you choose "CUSTOM" in "COLOR TONE" you can adjust R.G.B.
- 7 Press EXIT button to TV viewing or press MENU button to return to the previous menu.

- ◆ CUSTOM : When the user wants to set the degree of RGB directly.

- 6 Press ↵ button to select "Factory Set".
A window will appear, asking you to confirm.
- 7 When the menu asks you to confirm the reset, press ↵ if you want to reset or press EXIT key if you want to void the reset.

✓ *When you forgot your new password, please consult the shop where you bought the TV or the nearest dealer.*
✓ *After choosing Factory Set, reset the power.*

Setting DayLight Saving Time(Summer Time)

Users can use this menu when they want to change a TV channel to a Radio channel or vice versa.

- 1 Press ▲/ ▼ buttons to select “DL Saving”
- 2 Press ◀/ ▶ buttons to select.
Then it will change “YES” or “NO”

YES : Set for daylight saving function activated. The current time automatically moves on hour ahead.

NO : Set for daylight saving function deactivated. The current time automatically moves on hour behind.

✓ Without current local time setting, this menu cannot be processed.

How to TV/RADIO switching

Users can use this menu when they want to change a TV channel to a Radio channel or vice versa.

➔ Press “TV/RADIO” button.

Avoid listening to the radio for a long time, without changing the screen image. It can cause “Image Sticking”.

Check “Image Retention Effect (Image Sticking)” at the beginning of the manual.

✓ it will convert to Black screen after 5-10 seconds for remove after image.

How to Subtitle / Audio

Users can adjust the subtitle and audio condition/status of the current channel.

- 1 Press "S.MODE" button.
Subtitle and audio related window will be displayed on the screen.
 - 2 Select required option by pressing the ▲ / ▼ buttons, then Press ◀ / ▶ buttons to select you want.
- If Dig. Output is supported, you can select MPEG Stereo or Dolby Digital/AC3.

✓ These subtitle and audio parameters are workable only when the receiving channel supports these functions

How to Select Channel / Information

Brief information is displayed, such as current channel type, name, local start/end time, guide information, current time, fav/normal mode, Audio mode and Audio ID.

- ➔ Press "INFO" button.
The information bar will pop-up.

✓ If you have no information : Check if your local time settings are correct or information is not sent by the channel provider.

How to Set Teletext in DTV

You can use Teletext service in iDTV mode.

The  icon on the screen means your TV is receiving Teletext service.

- 1 Press "TTX/MIX" button and wait.
If the "*" sign pops up left upside of the screen as the following picture, wait until the teletext service menu is displayed "*" means it provides teletext service. So wait a moment.
- 2 Select your interesting item with numeric keys.

Troubleshooting

Symptom Possible solution

How can I install an antenna?	Refer to page 13.
TV screen is not clear after installing an indoors antenna.	Indoors antenna may experience poor reception due to surrounding buildings. Please install an outdoors antenna or wireless antenna.
How can I view cable broadcasting?	Please install a cable broadcasting receiver (Converter).

Symptom Possible solution

Neither picture nor sound comes up.	Check whether power is on. Check whether the power is cut or whether the power cord is properly connected. Try to plug another product's power cord to the same outlet to check the outlet itself.
Picture turns on slowly after power is on.	This symptom is not a malfunction. This delay is designed to prevent the distorted and noisy picture when the power is on. However, if the picture does not appear more than 5 minutes after the power is on, call a service center.
Picture is distorted or frozen while watching digital broadcasting.	This symptom may be caused by weak reception. Contact your local station or cable company.
Input Source information only appears on black screen.	Check whether your TV is properly connected to external devices.
Poor reception on some channels.	Check whether you selected proper channels. Try re-orienting your antenna. Ensure LNA is activated.
Black and white on some channels.	Check other channels for black and white screen. Adjust colour.
TV won't turn on.	Ensure the power cord is plugged.
Screen is too bright or too dark.	Adjust brightness.
Auto On does not work.	Ensure to use the remote control or power button on the product to turn off your TV. If you unplug the power cord, the stand-by consumption power becomes 0 (zero), which causes the programmed time to be erased.

Troubleshooting

After setting the time, I turned TV off and turn it on. The programmed information has been erased.

Ensure to use the remote control or power button on the product to turn off your TV. If you unplug the power cord, the stand-by consumption power becomes 0 (zero), which causes the programmed time to be erased.

Symptom Possible solution

Too much noise occurs.	Check whether the audio setting is in the Stereo mode. In the Stereo mode, the sound may be distorted in areas with poor reception or located far away from a TV broadcasting station.
No sound while viewing a cable channel	Make sure audio or audio/video components are securely inserted into the appropriate jacks. Check other channels for sound. Check the volume settings on the cable broadcasting receiver.
Picture is OK but sound does not come out.	Try to press volume up/volume down buttons of your remote control.
One of the speakers does not produce sound.	Select sound balance and make proper adjustment. (Page 23) Check the speaker connection cables.

Symptom Possible solution

Remote control won't work.	Check whether there is a blocking object between the remote control and PDP. Make sure your PDP is Power On. (Normally, the LED on the front panel is red.) Check whether batteries are inserted with proper polarities(+, -). When the batteries are worn out, replace them.
Where does the S-Video cable plug in for audio output?	Connect the two Audio jacks from the S-Video cable to the left and right ports on the Composite.
Strange noises are heard.	Ticking noises during or after watching are caused by the change of ambient environment such as humidity and temperature, which is characterized by plastic products. Strange ticking noises occur because a signal is suddenly transmitted to the PDP panel. So, It is not a malfunction.
I tried to use the TV screen as a PC monitor but it doesn't work.	Adjust the resolution referring to the standard signal mode table. Check the specification of your video card installed in your PC. If your video card does not work in the supported hardware, try upgrading the video card's driver.
